| Framer Motion | Intermediate |

## TOOLS & WORKFLOW

## PROFESSIONAL SUMMARY

Frontend Developer focused on building modern, responsive, and scalable web interfaces using React.js, Next.js, TypeScript, and Tailwind CSS. I write clean, reusable, and maintainable code with organized frontend architecture.

I build professional portfolio websites, dashboards, landing pages, marketplace interfaces, and business websites with attention to user experience, responsive design, performance, and clean UI implementation.

## CORE SERVICES

- Responsive websites and web applications.
- Professional portfolio websites and business landing pages.
- Admin dashboards and business management interfaces.
- Marketplace-style interfaces with product listing and details pages.
- Clean React/Next.js components with feature-based and component-based architecture.
- Frontend deployment workflow using Vercel.

## CAREER OBJECTIVE

I am seeking an Internship or Junior Frontend Developer opportunity where I can contribute to real web applications, work with a technical team, improve my practical experience, and continue growing toward full-stack development.

## STRENGTHS

- Strong frontend fundamentals and responsive UI implementation.
- Good practical experience with React.js and Next.js.
- Clean code mindset with reusable and scalable components.
- Understanding of project architecture and folder organization.
- Fast learner with strong motivation to improve.

## ■ SELECTED PROJECTS

### Task Flow - Company & Project Management Dashboard

React.js, JavaScript, CSS, Component-Based Architecture

A dashboard interface for managing company projects and tasks. The project focuses on organizing tasks inside projects and presenting a clean dashboard experience for business management.

- Dashboard-style interface.
- Project and task organization.
- Clean component structure.
- Responsive UI.
- Reusable components.
- Focus on maintainability.

### Mini Market Gaza - Local Marketplace Interface

Next.js, TypeScript, Tailwind CSS, Responsive Design

A small marketplace-style application designed for buying and selling products inside Gaza. Built as a practical training project to improve frontend architecture, UI structure, and scalable Next.js development.

- Product listing interface.
- Product details pages.
- Responsive layout.
- Marketplace-style UX.
- Clean project structure.
- Reusable components.

### Personal Portfolio Website

Next.js, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion

A professional portfolio website built to present my frontend identity, showcase projects, and provide clear sections such as About Me, Projects, and Contact.

- Modern personal branding.
- Projects as case studies.
- About Me and Contact pages.
- Responsive design.
- Smooth interactions.
- Scalable Next.js architecture.

## ■ BACKEND LEARNING

**Node.js & Express.js:** currently learning backend fundamentals to grow toward full-stack development.

## ■ EDUCATION

### Bachelor's Degree in Software Engineering

Al-Azhar University - Gaza

## ■ POSITIONING STATEMENT

I present myself as an early-career Frontend Developer with real personal and training projects, a clear learning path, and a strong focus on clean interfaces, reusable components, and organized project structure.
